

Woodlands Health

Woodlands Health will be Singapore's latest public healthcare institution and will provide care to residents in northwest Singapore. Set to open progressively from end 2023, the Campus will feature a fully integrated acute and community hospital, specialist outpatient clinics, intermediate and long-term care facilities, and green healing spaces. We will offer a range of acute, sub-acute, rehabilitative and transitional care services, working closely with our partners to provide seamless care within and beyond our Campus. When fully open, Woodlands Health will operate 1400 beds across 3 care settings.

Woodlands Health is a member of the National Healthcare Group; which provides care through an integrated network of primary care polyclinics, acute care and tertiary hospitals and national specialty centres to one third of Singapore's population. Clinicians within NHG are actively engaged in Clinical Research and Education through affiliations with Lee Kong Chian School of Medicine and Yong Loo Lin School of Medicine.

We are committed to supporting our staff's professional development; and opportunities will be provided to those who aspire to excel in the fields of Clinical Research and Education.

1. Consultant Anatomical Pathologist

The candidate should demonstrate good teamwork and communication skills, strong working knowledge of laboratory operations, and a commitment to quality improvement: there are plans to introduce digital pathology in a few years. The candidate is expected to report both histopathology and cytopathology cases, including frozen sections and fine-needle aspiration specimens, and participate in quality assurance programmes, multidisciplinary meetings, and institutional or departmental committees.

2. Consultant Chemical Pathologist

The candidate should demonstrate good teamwork and communication skills, strong working knowledge of laboratory operations, and a commitment to quality improvement. The candidate is expected to have clinical oversight of the Biochemistry and Point-of-Care Testing sections of the laboratory, help the laboratory to ensure compliance with local regulations and internationally recognised accreditation standards, and participate in quality assurance programmes and institutional or departmental committees.

Requirements

Candidates interested in the Pathologist positions must meet registration criteria with the Singapore Medical Council, and hold a postgraduate qualification from the Royal College of Pathologists or the Royal College of Pathologists of Australasia, or a qualification recognised by SMC.

3. Resident Physician

The Resident Physician provides comprehensive patient care in your chosen discipline of practice, under the supervision of Specialist doctors. You are a key member of the team, where you will gain strong clinical experience and maximise your potential. You will guide the junior doctors and take on any other responsibilities assigned by your reporting officer. You will work in a team-based environment with other healthcare professionals to provide holistic patient care. In addition to your core clinical duties, you will also be provided mentorship and support to develop any interests in Education, Research and Health Administration.

We have vacancies in Anaesthesia, Emergency Medicine, Geriatric Medicine, Intensive Care Medicine, Infectious Diseases, General Medicine, Medical Psychiatry, Medical Oncology, Neurology, Neurosurgery, Ophthalmology, Otolaryngology (ENT), Orthopaedic Surgery, Palliative Medicine, Post-Acute & Rehabilitative Care, Radiology, Renal Medicine, Surgery, Urology.
