

Consultant Anatomical Pathologist (Woodlands Health, Singapore)

Woodlands Health will be Singapore's latest Public Healthcare Institution and will provide care to residents in northwest Singapore. Set to open progressively from the end of 2023, the Campus will feature a fully integrated acute and community hospital, specialist outpatient clinics, intermediate and long-term care facilities, and green healing spaces. We will offer a range of acute, sub-acute, rehabilitative and transitional care services, working closely with our partners to provide seamless care within and beyond our Campus. When fully open, WH will operate 1400 beds across 3 care settings.

We are currently looking for a **Consultant Anatomical Pathologist** to join us on this exciting journey in the Department of Laboratory Medicine and Pathology service.

Candidates should demonstrate good teamwork and communication skills, strong working knowledge of laboratory operations, and a commitment to quality improvement: there are plans to introduce digital pathology in a few years. Candidates are expected to report both histopathology and cytopathology cases, including frozen sections and fine-needle aspiration specimens, and participate in quality assurance programmes, multidisciplinary meetings, and institutional or departmental committees.

We are committed to supporting our staff's professional development; and opportunities will be provided to those who aspire to excel in the fields of Clinical Research and Education.

Interested candidates must be registered or eligible for registration with the Singapore Medical Council, and hold a postgraduate qualification from the Royal College of Pathologists or the Royal College of Pathologists of Australasia, or a qualification recognised by these bodies.

Woodlands Health is a member of the National Healthcare Group; which provides care through an integrated network of primary care polyclinics, acute care and tertiary hospitals and national specialty centres to one third of Singapore. Clinicians within NHG are actively engaged in Clinical Research and Education through affiliations with Lee Kong Chian School of Medicine and Yong Loo Lin School of Medicine.

Resident Physician (Woodlands Health, Singapore)

The **Resident Physician** provides comprehensive patient care in your chosen discipline of practice, under the supervision of Specialist doctors. You are a key member of the team, where you will gain strong clinical experience and maximize your potential. You will guide the junior doctors (Medical Officers, House Officers) and take on any other responsibilities assigned by your reporting officer. You will work in a team-based environment with other healthcare professionals to provide holistic patient care. In addition to your core clinical duties, you will also be provided mentorship and support to develop any interests in Education, Research and Health Administration.

We have vacancies in Anaesthesia, Emergency Medicine, Intensive Care Medicine, Infectious Diseases, General Medicine, Medical Psychiatry, Medical Oncology, Neurology, Neurosurgery, Ophthalmology, Otolaryngology (ENT), Orthopaedic Surgery, Post-Acute & Rehabilitative Care, Radiology, Renal Medicine, Surgery, Urology.

Interested candidates must be registered or eligible for registration with the Singapore Medical Council.
