SUPPLEMENTARY FIG. Distribution of neonatal deaths (No. of cases and proportion) during 2000-2019, stratified according to primary cause of death

- Congenital or genetic abnormalities
  - Chromosomal
  - Structural
  - Haematological (all haemoglobin Barts)
  - Hydrops fetalis (idiopathic)
- Prematurity
- Sepsis
- Hypoxic-ischaemic encephalopathy
- Sudden infant death syndrome

- Congenital or genetic abnormalities, 82 (44.6%)
- Prematurity, 52 (63.4%)
- Sepsis, 16 (8.7%)
- Chromosomal, 15 (8.2%)
- Structural, 2 (1.1%)

Total: 153 cases

Proportions:
- Congenital or genetic abnormalities: 44.6%
- Prematurity: 63.4%
- Sepsis: 8.7%
- Chromosomal: 8.2%
- Structural: 1.1%
